Previous Research Experience:

University of Michigan Medical Center – Departments of Otolaryngology and Cardiology, Ann Arbor, MI, 2004 (Clinical Researcher)

-Project:

MICHIGAN PREOPERATIVE RISK EVALUATION IN OTOLARYNGOLOGY PATIENTS (M-PRE OP)

- Assisted with a project examining pre-operative and intra-operative risk factors to aid in risk assessment and management for head and neck surgical procedures

University of Michigan Medical Center – Department of Otolaryngology, Dr. Carol Bradford & Dr. Thomas Carey Laboratory, Ann Arbor, MI, 2004 (Laboratory Researcher)

- Analyzed the tyrosine kinase domain of the EGF receptor in head and neck squamous cell carcinoma for mutations and deletions, using UMSCC tumor cell lines

- These mutations may lead to increased EGFR activation or tumor sensitivity to adjuvant therapy, such as EGFR inhibitors, previously seen to be beneficial in non-small cell lung cancer

Columbia Presbyterian Medical Center – Department of Neurological Surgery, New York, NY, 2002 (Clinical Researcher)

- Organized a clinical research project examining risk factors and outcomes in cerebrovascular neurosurgery

- Created a database of over 1500 cerebrovascular patients with AVMs, cerebral aneurysms, and carotid artery disease

National Institutes of Health – Divisions of NICHD and NIAAA, Bethesda, MD, 2000 (Biomedical Research Intern)

- Project 1: CARDIOVASCULAR CYCLICITY AND RESPONSE TO PHARMACOLOGIC CHALLENGE IN RHESUS MACAQUES (MACACA MULATTA)

- Examined the circadian component of heart rate variability in rhesus monkeys using a continuous measure of cardiac output

- Investigated the response of cardiac signal complexity to pharmacologic challenge

- Presented poster at the National Institutes of Health Poster Day, 2000

-Project 2: INDIVIDUAL DIFFERENCES IN ACTIVITY CYCLES AMONG YOUNG RHESUS MACAQUES (MACACA MULATTA)

- Assessed differences in circadian activity cycles among rhesus monkeys

- Examined the effects of various environmental events on monkeys’ activity levels, in order to understand the importance of early experiences, such as rearing

- Presented poster at the National Institutes of Health Poster Day, 2000

University of Michigan Medical Center – Department of Pharmacology, Dr. James H. Woods Laboratory, Ann Arbor, MI, 1998-1999 (Pharmacology Research Assistant)

-Project: NATURAL AND ARTIFICIAL ENZYMES AGAINST COCAINE. I. MONOCLONAL ANTIBODY 15A10 AND THE REINFORCING EFFECTS OF COCAINE IN RATS

- Investigated and tested the efficacy of an anti-cocaine antibody to combat drug addiction
- Administered anesthesia and performed surgical procedures for catheter placement in rodent
